Charles,
 The file SOS_txt.exe successfully transferred to SOS this morning.

Thanks,
 Vani

The script ran last night with all filters but #1. It generated over 23M rows of data. I dumped it out to a text file and put it on FTP site for Vani to transport over to SOS. The file was too large for me to test it.

This is the conversion that I used for the output format. They asked me not to use the UNICODE.

Data Conversion Transformation Editor

Configure the properties used to convert the data type of an input column to a different data type. Depending on the data type to which the column is converted, set the length, precision, scale, and code page of the column.

Available Input Columns

Input Column	Data Type	Length	Precision	Scale	Code Page
County Code	string [DT_STR]	3			1252 (ANSI - Latin I)
DPSPID	numeric [DT_NUMERIC]		11	0	
Last Name	string [DT_STR]	40			1252 (ANSI - Latin I)
First Name	string [DT_STR]	40			1252 (ANSI - Latin I)
Middle Name	string [DT_STR]	40			1252 (ANSI - Latin I)
Name Suffix	string [DT_STR]	10			1252 (ANSI - Latin I)
SSN	string [DT_STR]	9			1252 (ANSI - Latin I)
Gender	string [DT_STR]	1			1252 (ANSI - Latin I)
TOL or TID Number	numeric [DT_NUMERIC]		11	0	
Issue Date	database date [DT_DBDATE]				
Date of Birth	database date [DT_DBDATE]				
Ethnicity	string [DT_STR]	1			1252 (ANSI - Latin I)

DEF1243

a table. We can easily change the format of the extract. But I will not have access to VPN over
